In recent years, though, a number of U.S.-based insurance companies have developed similar policies that meet all U.S. insurance, investment, and tax regulations. PPLI is becoming a fundamental component of effective tax, trust, and estate planning, but few sources have been available to detail the best practices—until now. All of this known information falls into three categories: First, there is a certain amount of information that we know and that we are aware that we know. We could say that we are "consciously competent" of this information. Second, there is a large amount of information that we know nothing about. We know that there are certain fields or concepts "out there," but we really don't know anything about them. We might say that we are "consciously incompetent" of this information. The third category of knowledge represents information we don't know, and we're not even aware that we don't know it. We are "unconsciously incompetent" in these areas. It doesn't mean that the information doesn't exist; it just means that we are
