The general purpose of this study is to examine how restructuring has affected company performance in Canada. The following matters are studied: the general and specific factors that have fuelled restructuring in Canadian firms; the general pattern of restructuring practices and the forms of restructuring; reasons for successful restructuring in some companies, and whether Canadian firms can learn from such experience; and the effects of restructuring on company profitability, productivity, and employment. Basic data for the study were compiled from an interview survey of individual companies. Types of restructuring examined include downsizing, total quality management, re-engineering, and outsourcing. The concluding section discusses whether corporate restructuring is successful and why, and shows what role government programs have played in corporate restructuring in Canada.

Histoire de l'Am é rique

*Dans ce livre, compos de deux volets, mon intention est de
confronter l'humanisme ancien l'humanisme moderne. En opposition
avec les modernes, les Anciens s'efforcent d'couter la nature.
Respecter l'harmonie naturelle devient la rgle d'or de l'homme
ancien qui s'vertue l'appliquer dans toutes les manifestations
de sa vie individuelle et sociale. L'humanisme ancien est fond*

sur l'altrit dissemblable. Pour cet humanisme, l'autre est celui qui ne possde pas la culture du juste (athmistos), le barbare, donc celui qui, au lieu de pratiquer la vertu, s'applique l'exercice de la violence. Cette culture, comprenant la fois une dimension thique et juridique, transforme une vie d'anarchie et de laideur, symptmes de l'injustice, en une vie d'quilibre et de beaut piliers de la justice et du droit. Contrairement l'humanisme d'aujourd'hui fond sur la ressemblance des visages et sur l'galit des existences, l'humanisme hellnique est fond sur la dissemblance. Dans l'humanisme moderne et postmoderne, toutes les vies humaines possdent la mme valeur ontologique, c'est--dire une valeur inhrente l'homme en tant qu'homme.

The Agronomy and Economy of Turmeric and Ginger

L' amour décent et délicat

Holm oak (*Quercus ilex* L.) forests and woodlands have been considered as a paradigm for Mediterranean terrestrial ecosystems. In the western part of the Mediterranean Basin, these forests and woodlands occupy large areas and thus play a very important role in the landscape. A number of research projects from the Centre d'Ecologie Fonctionnelle et Evolutive (CEFE), the Centre de Recerca Ecológica i Aplicacions Forestals (CREAF), and from many other laboratories are currently focusing on *Q. ilex* ecosystems, and a number of problems have appeared concerning not only basic knowledge but also management aspects. For this reason, the CEFE and the CREAM decided to jointly organize the workshop on *Quercus ilex* L. Ecosystems, which was held in Montpellier and Barcelona in September 1990. The present volume consists of a selection of papers presented during the workshop and other papers contributed after the workshop. The papers are divided into five sections: Biogeography and History; Structure, Productivity and Dynamics; Water Relationships; Nutrient Cycling; and Management.

This book discusses the various aspects, from production to marketing of turmeric and ginger, the world's two most important and invaluable medicinal spice crops. The book begins with their origin and history, global spread, and goes on to describe the botany, production agronomy, fertilizer practices, pest

management, post-harvest technology, pharmacology and nutraceutical uses. The book presents the economy, import-export and world markets involved with reference to turmeric and ginger. It would be a benchmark and an important reference source for scientists, students, both undergraduate and post graduate, studying agriculture and food sciences and policy makers. It would be of great interest to professionals and industry involved in spice trade.

A Riffaterrean Reading of Patrick Modiano's La Place de L'étoile

A collection of reports on the situation of urban archaeology in 22 European countries. All the reports of the situation in the separate countries give amongst others attention to definitions of urban archaeology, to previous research, databases, maps and evaluation techniques in the field, to the legal framework, financial support and numbers, status and qualifications of those who work in urban archaeology, to the balance between

preservation and use, the contribution of urban archaeology to education and the understanding of the historic environment. The book is the result of decisions made during the 3th International Conference of Ministers responsible for the cultural heritage, held in Malta in 1992, where the revised European Convention on the protection of the Archaeological Heritage was signed. To promote the implementation of this convention the ministers recommend a number of actions which together might form a 'European Archaeology'. This handbook was one of those actions.
