This book is one of the first to link company law to the law of succession by concentrating on family businesses. It shows that, to understand the legal framework underlying the daily operations of family businesses, one needs legal analysis, empirical data, psychological and sociological knowledge. The book works on the premise that, since many businesses have been founded by families, practitioners need to develop an understanding of the legal background of such businesses and build up experience to be able to create contracts, trusts, foundations and other legal mechanisms to give shape to systems and procedures for the transfer of shares and control within the family. Comparing the national legal order, techniques, and mechanisms in a range of countries, the book examines parallel developments in these fields of law across the world. Finally, it demonstrates the room for companies, shareholders and the members of a family to develop individual solutions within the legal framework for transferring businesses and shares to the next generation.

Provides more than seven hundred alphabetical entries covering the interaction of law and society around the globe, including the sociology of law, law and economics, law and political science, psychology and law, and criminology.

From the Foreword by Rubén F. Balane, Ateneo Law School professor: "Walking with Pedro through his multifarious, protean life as single, as married, and as widower, Atty. Rotor-Hilado explains to the reader the various possible kinds of heirs he might have and the various options he may choose to dispose of his estate. He may, of course, choose to leave this world without a will. To whom, then, will his properties go? Or he may decide to make a will. How much, then, can he give away? "Through this marvelous and informative book, Atty. Rotor-Hilado, using her lawyer's knowledge and couching it in terms that are free of the ponderousness of legalese, guides the reader who is a non-lawyer to an adequate acquaintance with the law of succession—adequate, that is, as a basis for deciding to whom and in what amounts his estate should go when he himself goes . . . "I invite the reader, across the broad band of the economic spectrum, whether he owns a fortune or a piece of real estate the size of a flower pot, to embark on this information-filled journey through successional law."

An analysis of how constitutional monarchy functions in a modern democracy, showing how it serves to stabilize and sustain democratic government. The book offers reflections on the future of the monarchy, based firmly upon its history.

This report makes recommendations for reform of the law and presents two draft Bills to implement the necessary changes. Firstly, The draft Inheritance and Trustees' Powers Bill includes reforms that would: ensure that where a couple are married or in a civil partnership, assets pass on intestacy to the surviving spouse in all cases where there are no children or other descendants; simplify the sharing of assets on intestacy where the deceased was survived by a spouse and children or other descendants; protect children who suffer the death of a parent from the risk of losing an inheritance from that parent in the event that they are adopted after the death; amend the legal rules which currently disadvantage unmarried fathers when a child dies intestate; remove arbitrary obstacles to family provision claims by dependants of the deceased and anyone treated by the deceased as a child of his or her family outside the context of a marriage or civil partnership; permit a claim for family provision in certain circumstances where the deceased died "domiciled" outside of England and Wales but left property and family members or dependants here; and reform trustees' statutory powers to use income and capital for the benefit of trust beneficiaries (subject to any express provisions in the trust instrument). Secondly, The draft Inheritance (Cohabitants) Bill contains further provisions that would give certain unmarried partners who have lived together for five years the right to inherit on each other's death under the intestacy rules. Where the couple have a child together, this entitlement would accrue after two years' cohabitation, provided the child was living with the couple when the deceased died.

The book also illustrates the author's "mode of the codifying of non-basic laws" for compiling a Civil Code, and includes a detailed discussion on compiling a Civil Code to reveal how many valid laws there are China - a matter that is of vital importance to the compilation of the Civil Code.
