This book contains readings of American, British and European postmodern dances informed by feminist, postcolonialist, queer and poststructuralist theories. It explores the roles dance and space play in constructing subjectivity. By focusing on site-specific dance, the mutual construction of bodies and spaces, body-space interfaces and 'in-between spaces', the dances and dance films are read 'against the grain' to reveal their potential for troubling conventional notions of subjectivity associated with a white, Western, heterosexual able-bodied, male norm.

With easy-to-understand explanations and real-life examples, Management & Cost Accounting For Dummies provides students and trainees with the basic concepts, terminology and methods to identify, measure, analyse, interpret, and communicate accounting information in the context of managerial decision-making. Major topics include: cost behaviour cost analysis profit planning and control measures accounting for decentralized operations budgeting decisions ethical challenges in management and cost accounting
