This book explores teaching and learning in lower secondary classrooms in the three PISA domains science, mathematics and reading. Based on extensive video documentation from science, math and reading classrooms in Norwegian secondary schooling, it analyzes how offered and experienced teaching and learning opportunities in these three subject areas support students' learning. The in-depth investigations of video documentation are combined with analysis of the Norwegian PISA results in order to understand how

teaching and learning in science, mathematics and reading can be improved. Recent reviews indicate that instructional practice does make a difference to students learning - and is more important than other factors including students' socioeconomic background, class size, classroom climate, and teachers' experience and formal training. This book opens the discussion on a European basis about contemporary challenges in teaching and learning in secondary schooling. Norway as a test bed is particularly interesting due to its long tradition with national curricula, and its unitary and non-streamed structure. Furthermore, ideas of educational progressivism and students' active ways of working (such as individualized teaching, adapted teaching, inquiry based teaching etc.) have for a long time been actively promoted within Norwegian educational policies. The book draws on analyses that combine expertise in psychometrics and video-based micro genetic classroom studies with expertise in domain-specific instruction (math, science and reading). It feeds the conversation how issues of communication patterns are dealt with and made productive within different instructional formats, and presents possibilities to compare and analyze instructional formats and discursive practices for students' learning.

This text is designed specifically to meet the needs of preservice teachers who have had little experience working in middle-grade classrooms.

*Three ideas are central: * teaching language arts at the middle level is a complex activity that demands expertise in the use of a variety of strategies, * reading and writing are key processes of language arts study, but so are speaking, listening, and viewing/visually representing, and * teaching the processes of effective communication is crucial, but middle school students must also begin to learn the content of the field--literature, language, and media. Teaching Language Arts in Middle Schools gives balanced attention to various teaching strategies, processes, and content, demonstrating how all of these connect to improve students' abilities to communicate. In this text: *Research and theory are summarized and applied to practice *A non-prescriptive approach is integrated with practical information *Debates in the field are acknowledged *Additional reading and research are emphasized *The author's voice and point of view are explicit*

Most pre-service education students are enthusiastic about the progressive, constructivist, and student-centered theory and practice advocated in many teacher education programs and by the National Council of Teachers of English. Yet in actual day-to-day practice, teachers often have trouble thinking of ways in which such student-centered and constructivist practices in literacy instruction can be implemented in classrooms which are increasingly driven by high stakes tests, increased accountability, and mandated and even 'teacher proof' scripted curricula. Teaching Authentic Language Arts in a Test-Driven Era provides a powerful and much-needed counterargument to the assumption that test-driven curricula preclude meaningful instruction and authentic student engagement within a Language Arts curriculum. Providing teachers with the theoretical stances and pedagogical tools to develop a Language Arts practice which can be personally rewarding as well as beneficial to students, Teaching Authentic Language Arts in a Test-Driven Era empowers teachers to be effective even within the confines of a testing- and accountability-driven curriculum.

Teaching Language Arts in Middle Schools

The goal of this book -- a theoretically based, well-organized, useful guide for teaching -- is to help the beginning teacher create a classroom environment that integrates literacy development with learning in all areas of the curriculum. The major components of an integrated language program are identified, and the skills teachers need to implement this kind of program in their own classrooms are described. Designed to be kept and used as a resource in the classroom, this text provides fundamental information about language arts teaching. A constructivist orientation, an emphasis on teachers as reflective decision makers, and vivid portrayals of the classroom as a community of learners and inquirers are woven throughout the book. Key features include: * a wealth of models, suggestions, and step-by-step guidelines

The diversity of student populations in the United States presents educators with many challenges. To provide effective reading instruction for the individual student, teachers must understand the enormous variety of reading methods and materials that exist and make independent decisions based on their students' particular needs. Research indicates that educators are often influenced by reading instruction fads that quickly fade, making it more challenging to develop a repertoire of teaching strategies in which a teacher may have confidence. This book examines a variety of reading methods used in American schools from the 19th to the 21st century, and the literature promoting or critiquing them, to help teachers become informed decision makers and better meet the needs of students.
