The result of more than years of intense experimental work, Galvani's milestone achievement concluded a thousand-year scientific search, in a field long dominated by the antiquated beliefs of classical science. Besides laying the grounds for the development of the

This book

synthesizes

research

findings on

Acces PDF Making Frog With A Square Paper

patterns in the
last twenty
years or so in
order to argue
for a theory of
graded
representations
in pattern
generalization.
While research
results drawn
from
investigations
conducted with

Acces PDF

Making Frog With A Square Paper

different age-level groups have sufficiently demonstrated varying shifts in structural awareness and competence, which influence the eventual shape of an intended generalization,

Acces PDF

Making Frog With A Square Paper

such shifts,
however, are not
necessarily
permanent due to
other pertinent
factors such as
the complexity
of patterning
tasks. The book
proposes an
alternative view
of pattern
generalization,
that is, one

Acces PDF

Making Frog With A Square Paper

that is not
about shifts or
transition
phases but
graded depending
on individual
experiences with
target patterns.
The theory of
graded
representations
involving
pattern
generalization

Acces PDF

Making Frog With A Square Paper

offers a much more robust understanding of differences in patterning competence since it is sensitive to varying levels of entry into generalization. Empirical evidence will be provided to

Acces PDF

Making Frog With A Square Paper

demonstrate this alternative view, which is drawn from the author's longitudinal work with elementary and middle school children, including several investigations conducted with

Acces PDF Making Frog With A Square Paper

preservice
elementary
majors. Two
chapters of the
book will be
devoted to
extending
pattern
generalization
activity to
arithmetic and
algebraic
learning of
concepts and

processes. The concluding chapter addresses the pedagogical significance of pattern learning in the school mathematics curriculum.
