Chinese residential communities are places of intense governing and an arena of active political engagement between state and society. In The Government Next Door, Luigi Tomba investigates how the goals of a government consolidated in a distant authority materialize in citizens' everyday lives. Chinese neighborhoods reveal much about the changing nature of governing practices in the country. Government action is driven by the need to preserve social and political stability, but such priorities must adapt to the progressive privatization of urban residential space and an increasingly complex set of societal forces. Tomba's vivid ethnographic accounts of neighborhood life and politics in Beijing, Shenyang, and Chengdu depict how such local "translation" of government priorities takes place. Tomba reveals how different clusters of residential space are governed more or less intensely depending on the residents' social status; how disgruntled communities with high unemployment are still managed with the pastoral strategies typical of the socialist tradition, while high-income neighbors are allowed greater autonomy in exchange for a greater concern for social order. Conflicts are contained by the gated structures of the neighborhoods to prevent systemic challenges to the government, and middle-class lifestyles have become exemplars of a new, responsible form of citizenship. At times of conflict and in daily interactions, the penetration of the state discourse about social stability becomes clear.

In this riveting book, authors and authorities on modern day slavery Kevin Bales and Ron Soodalter expose the disturbing phenomenon of human trafficking and slavery that exists now in the United States. In The Slave Next Door we find that slaves are all around us, hidden in plain sight: the dishwasher in the kitchen of the neighborhood restaurant, the kids on the corner selling cheap trinkets, the man sweeping the floor of the local department store. In these pages we also meet some unexpected slaveholders, such as a 27-year old middle-class Texas housewife who is currently serving a life sentence for offences including slavery. Weaving together a wealth of voices—from slaves, slaveholders, and traffickers as well as from experts, counselors, law enforcement officers, rescue and support groups, and others—this book is also a call to action, telling what we, as private citizens, can do to finally bring an end to this horrific crime.

In the 1960s the Air Force buried 1,000 ICBMs in pastures across the Great Plains to keep U.S. nuclear strategy out of view. As rural civilians of all political stripes found themselves living in the Soviet crosshairs, a proud Plains individualism gave way to an economic dependence on the military-industrial complex that still persists today.

The house next door to the Kennedys appears to be haunted by an all-pervasive evil, and the couple watches as a succession of owners becomes engulfed by the sinister force, until the Kennedys set out to destroy the house themselves.

I, Julia Bradford, write this story to you the readers to tell you of the happenings of my life when my first big mystery was upon me. I was in my early twenties, a widow with a son. At least I thought I was a widow. It seemed that I was all alone in the world after my husband's death was announced. I was eighteen then and about to have a baby. I had my son three months after the wreck that took my husband away. Later on he came back; it was about three years after the wreck occurred. I was at the wedding of a friend. Several months after my friend's marriage, I discovered that it had happened again—I was going to have a baby. I had a girl—Cynthia Darlene. Both my children have grown up. Jeff is a surgeon like his late father. Cindy was murdered one evening at her home; she left in the world a baby and her husband. I shall tell you a small portion about my daughter's death. It was a dark, stormy night; she was sitting on the lounge in the sitting room. She heard a noise and went into the kitchen to investigate, where she was murdered in cold blood. When she saw the thief, she screamed and the baby started crying. A neighbor heard the baby and came over to the house to find the back door open and Cindy lying on the floor dead. She called Cindy's husband and he came home from work. I will tell you more about her death later on in the future. Right now I shall indulge to tell you about the past—my past as I solved this and many other mysteries in my hometown.

South Asian American Literature and the Idea of America

The Pirates Next Door

The threat of terrorism in America, the Obama administration assures us, is contained and controlled. Recent attempted attacks like the Times Square bombing, the "underwear bombing" on a flight over Detroit, and the attack on a Christmas tree lighting ceremony in Oregon were all isolated plots that failed anyway. In the words of Homeland Security secretary Janet Napolitano, "The system worked." Don't believe it. In , investigative reporter Erick Stakelbeck exposes the staggering truth about our national security: the Obama administration is concealing and whitewashing the enormous terrorist threat growing right here within America's borders. If you believe terrorism is only a problem for other countries, Stakelbeck's on-the-ground reporting will open your eyes. He has been inside America's radical mosques, visited U.S.-based Islamic enclaves, and learned about our enemies by going straight to the source—interviewing al-Qaeda-linked terrorists themselves.

This book grows out of the question, "What is South Asian American writing and what insights can it offer us about living in the world at this particular moment of tense geopolitics and inter-linked economies?" South Asian American literature, with its focus on the multiple geographies and histories of the global dispersal of South Asians, pulls back from a close-up view of the United States to reveal a wider landscape of many nations and peoples. Drawing on the cosmopolitan sensibility of scholars like Anthony Appiah, Vinay Dharwadkar, Martha Nussbaum, Bruce Robbins, and Amartya Sen, this book argues that to read the body of South Asian American literature justly, one must engage with the urgencies of places as diverse as Bangladesh, Sri Lanka, India, Burma, Pakistan, and Trinidad. Poets, novelists, and playwrights like Indran Amirthanayagam, Meena Alexander, Amitav Ghosh, Michael Ondaatje, Shani Mootoo, Amitava Kumar, Tahira Naqvi, and Sharbari Ahmed exhort North American residents to envision connectedness with inhabitants of other lands. These writers' significant contribution to American literature and to the American imagination is to depict the nation as simultaneously discrete and entwined within the fold of other nations. The world out there arrives next door.

The challenges public comprehensive universities face today are expanding—they have been challenged to enroll and graduate more students, adopt new technologies that lower cost without sacrificing quality, and align program and curricular offerings with the skills that employers require. While these universities have a long history of adapting to change, today's environment will likely test the capabilities of even the most adaptive institutions. This volume assembles a team of experts from a variety of disciplines to examine both the history of the comprehensive university and what lies ahead. Overall, the book grapples with such questions as: How do these institutions adapt to serve the growing population of non-traditional students? How well do they prepare graduates for the labor market? Can partnerships between community colleges and comprehensive universities bolster student success? *The University Next Door* draws much-needed attention to a set of institutions that has historically received little notice, yet play an important role in meeting our new attainment goals and helping the American economy grow. **Book Features:** Examines the role of comprehensive universities from start to finish—their history and future. Uses empirical analysis to explore complex questions about which students choose these universities and why. Explores how these institutions might struggle under a federal ratings system such as the one proposed by President Obama. Discusses how these institutions can better monitor the needs of the economy and better educate students to fill those needs. Provides recommendations to inform future decisions about higher education policy. “In chapter after chapter, the contributors critically assess whether comprehensive universities can respond to the nation's ambitious call to action. This compelling volume is a valuable starting point for anybody concerned about the future of the institutions that help define American higher education as we know it today.” —Richard G. Rhoda, executive director, Tennessee Higher Education Commission “Schneider/Deane provides much-needed illumination on the U.S. higher education sector that will play a critical role in meeting the nation's educational, workforce, and economic goals. It will serve as a valuable resource for all stakeholders who seek to affect positive change in policy and practice at public comprehensive universities.” —Daniel J. The production of pharmaceuticals is among the most profitable industries on the planet. Drug companies produce chemical substances that can save, extend, or substantially improve the quality of human life. However, even as the companies present themselves publicly as health and environmental stewards, their factories are a significant source of air and water pollution--toxic to people and the environment. In Puerto Rico, the pharmaceutical industry is the backbone of the island's economy: in one small town alone, there are over a dozen drug factories representing five multinationals, the highest concentration per capita of such factories in the world. It is a place where the enforcement of environmental regulations and the public trust they ensure are often violated in the name of economic development. *The Drug Company Next Door* unites the concerns of critical medical anthropology with those of political ecology, investigating the multi-faceted role of pharmaceutical corporations as polluters, economic providers, and social actors. Rather than simply demonizing the drug companies, the volume explores the dynamics involved in their interactions with the local community and discusses the strategies used by both individuals and community groups to deal with the consequences of pollution. *The Drug Company Next Door* puts a human face on a growing set of problems for communities around the world. Accessible and engaging, the book encourages readers to think critically about the role of corporations in everyday life, health, and culture.
