Female orgasm is not a mystery, it is not complicated. In this ebook, very useful for all women and men of any age (and for sexual medicine experts, physicians, psychologists), there are links to free video/pdf: sexologists must teach in sex education how to stimulate the clitoris and labia minora with many illustrations and video. Many women have never looked at their vulva or are unable to identify the location of the clitoris and labia minora. Sexologists must explain that vaginal orgasm and G-spot do not exist (premature ejaculation is not a sexual dysfunction). Women can experience orgasm, multiple orgasms, orgasmic state and superorgasmic state in all ages, with effective stimulation of the female erectile organs during masturbation, cunnilingus, partner masturbation, and also during vaginal/anal intercourse simply by stimulating the clitoris/labia minora with a finger, or a sex toy. The first vaginal intercourse must always be with orgasms, without pain: males must learn to make love even in adolescence. Cunnilingus is a method to have one or more orgasms. Anal sex can give orgasms that can last also for minutes (i.e. superorgasmic state). Coitus must be one of many possibilities in a whole spectrum of possible physical relations, there are many ways of having sex. Ejaculation in the vagina does not have to be essential to define sexual intercourse as “complete”... The present volume provides a comparative look at the contents and layout features of secondary annotations in biblical manuscripts across linguistic traditions. Due to the privileged focus on the text in the columns, these annotations and the practices that produced them have not received the scholarly attention they deserve. The vast richness of extant verbal and figurative notes accompanying the biblical texts in the intercolumns and margins of the manuscript pages have thus been largely overlooked. The case studies gathered in this volume explore Jewish and Christian biblical manuscripts through the lens of their annotations, addressing the various relationships between the primary layer of text and the secondary notes, and exploring the roles and functions of annotated manuscripts as cultural artifacts. By approaching biblical manuscripts as potential "notepads", the volume offers theoretical reflection and empirical analyses of the ways in which secondary notes may shed new light on the development and transmission of text traditions, the shifting engagement with biblical manuscripts over time, as well as the change of use and interpretation that may result from the addition of the notes themselves.

A History of Architectural Conservation expands knowledge about the conservation of ancient monuments, works of art and historic buildings. It includes the origins of the interest in conservation within the European context, and the development from Antiquity and the Renaissance to the present day. Jokilehto illustrates how this development has influenced international collaboration in the protection and conservation of cultural heritage, and how it has formed the principal concepts of conservation and restoration in today's multi-cultural society. This book is based on archival research of original documents and the study of key restoration examples in countries that have influenced the international conservation movement. It is of interest to students and the general public it includes conservation trends in Europe, the USA, India, Iran and Japan.

Brill's Companion to the Reception of Plato in Antiquity demonstrates the variety of ways in which ancient readers responded to Plato, as author, as philosopher, and as leading intellectual light, from his own pupils until the sixth century C.E. Translating Culture Specific References on Television provides a model for investigating the problems posed by culture specific references in translation, drawing on case studies that explore the translational norms of contemporary Italian television. This monograph makes a distinctive contribution to the study of audiovisual translation and culture specific references in its focus on dubbing as opposed to subtitling, and on contemporary television series, rather than cinema. Irene Ranzato's analysis of three TV series dubbed into Italian, drawing on a corpus of 95 hours that includes nearly 3,000 CSR translations. Ranzato proposes a new taxonomy of strategies for the translation of CSRs and explores the sociocultural, pragmatic and ideological implications of audiovisual translation for the small screen.

Some of the most well-known and well-respected cultural figures of our time enter into intimate and illuminating conversation about their personal beliefs, about belief itself, about religion, and about God. Antonio Monda is a disarming, rigorous interviewer, asking the most difficult questions (he often begins an interview point blank: "Do you believe in God?") that lead to the most wide-ranging conversations. An ardent believer himself, Monda talks both with atheists (asked what she feels when she meets a believer, Grace Paley replies: "I respect his thinking and his beliefs, but at the same time I think he's deluded") and other believers, their discussion ranging from personal images of God (Michael Cunningham sees God as a black woman, Derek Walcott as a wise old white man with a beard) to religion's place in American culture, from the afterlife to the concepts of good and evil, from fundamentalism to the Bible. And almost without fail, the conversations turn to questions of art and literature. Toni Morrison discusses Virginia Woolf and William Faulkner, Richard Ford invokes Wallace Stevens, and David Lynch draws attention to the religious aspects of Bu-uel, Fellini...and Harold Ramis's Groundhog Day. Informal, revealing, unexpected, Do You Believe? is a captivating and thought-provoking meditation how faith, in all its facets, remains profoundly relevant for and in our culture. This book presents real-world decision support systems, i.e., systems that have been running for some time and as such have been tested in real environments and complex situations; the cases are from various application domains and highlight the best practices in each stage of the system's life cycle, from the initial requirements analysis and design phases to the final stages of the project. Each chapter provides decision-makers with recommendations and insights into lessons learned so that failures can be avoided and successes repeated. For this reason unsuccessful cases, which at some point of their life cycle were deemed as failures for one reason or another, are also included. All decision support systems are presented in a constructive, coherent and deductive manner to enhance the learning effect. It complements the many works that focus on theoretical aspects or individual module design and development by offering 'good' and 'bad' practices when developing and using decision support systems. Combining high-quality research with real-world implementations, it is of interest to researchers and professionals in industry alike.

The aim of this project is to offer the reader a critical edition and an English translation of 139 letters that were exchanged between the victims of Mussolini's racial laws and the Jesuit Pietro Tacchi Venturi.

This volume brings together a wide array of papers which explore, among other things, to what extent languages and cultures are variable with respect to the interactions around the event of death. Motivated by J. L. Mey's idea of the *pragmeme*, a situated speech act, the volume has both theoretical and practical implications for scholars working in different fields of enquiry. As the papers in this volume reveal, despite the terminological differences between various disciplines, the interactions around the event of death serve to provide solace, not only to the dying, but also to the family and friends of the deceased, thus helping them to "accommodate" to the new state of affairs.

The European Union and the single currency have given Europe more stability than it has known in the past thousand years, yet Europe seems to be in perpetual crisis about its global role. The many European empires are now reduced to a multiplicity of ethnicities, traditions, and civilizations. Europe will never be One, but to survive as a union it will have to become a federation of "islands" both distinct and connected. Though drawing on philosophers of Europe's past, Cacciari calls not to resist Europe's sunset but to embrace it. Europe will have to open up to the possibility that in few generations new exiles and an unpredictable cultural hybridism will again change all we know about the European legacy. Though scarcely alive in today's politics, the political unity of Europe is still a necessity, however impossible it seems to achieve.

In this exhilarating coming-of-age tale set in the late 19th century, a daring young woman braves the wilds of the mountainous Austrian-Italian border—and the dangerous men who conspired with her missing father to smuggle tobacco—in order to save her family. Jole de Boer is just fifteen years old the first time she accompanies her father—a tobacco grower named Augusto—as he smuggles his product across the Italian border into Austria. She knows the dangers of the treacherous high mountain passes—border guards, brigands, wild animals, ferocious weather—but she is proud that her father has asked her to join him. After all, without the extra money Augusto's smuggling brings in, their family would starve. But when Augusto mysteriously disappears during one of his trips, Jole must retrace the route he took to both find a buyer for her family's tobacco—and the truth behind her father's disappearance. An epic tale of revenge, corruption, and salvation, The Soul of the Border is an unforgettable journey into the wild.

The question of God and cosmology is far from abstract. In fact, the subject raises the deepest questions of human existence: "Why is there something rather than nothing?" Or, to put it more personally, "Why am I here?" Structured as a debate, the 2014 Greer-Hearth Forum focused on the issue of God and cosmology and its impact on life and self-understanding. Christian philosopher William Lane Craig and atheist cosmologist Sean Carroll presented their views before a packed crowd of more than nine hundred people. Spirited, civil, and often humorous, the debate highlighted not only their positions, but the full range of possibilities. In this volume, the content of that debate is reprinted and supplemented by a range of reflections by other conference presenters. The purpose of the Greer-Hearth Point-Counterpoint Forum is to provide a venue for fair-minded dialogue on subjects of importance in religion and culture. The goal is a respectful exchange of ideas, without compromise.

NOW A NETFLIX ORIGINAL SERIES Frustrated at the path her life has taken, Alice decides to take control of her personal life using astrology as her guide in this quirky, steamy, and hilarious romantic comedy. Alice Bassi is (a little) over thirty, single (not by choice), and she can't help but feel that she is failing at this whole adulthood thing. She's stuck in a dead-end job, just found out her ex-boyfriend is engaged to his pregnant girlfriend, and Richard Gere hasn't shown up with flowers and a limo to save her from it all. On one particularly disastrous morning—when Alice would much rather have stayed home, curled up with her favorite rom-coms—she meets Davide Nardi. Handsome yet indecipherable, Davide would be the leading man of Alice's dreams—if only he weren't the "hatchet man" brought in to help streamline production and personnel at the small television network she works for. In the midst of all this, Alice runs into Tio—an actor and astrology expert who is convinced he can turn her life around with a little help from the stars. Skeptical but willing, Alice decides to take Tio's advice and only date men whose Zodiac signs are compatible with hers. Unfortunately, it turns out that astrological affinity doesn't always guarantee a perfect match, nor prevent a series of terrible dates, disappointments, and awkward surprises. It also doesn't keep Davide from becoming more attractive every day. Perfect for fans of Bridget Jones's Diary and Star-Crossed, An Astrological Guide for Broken Hearts is a witty, sexy, and relatable portrait of a modern woman's search for love and a dream job, only to discover that your destiny isn't always written in the stars.

Exploring the science in George R. R. Martin's fantastical world, from the physics of an ice wall to the genetics of the Targaryens and Lannisters. Game of Thrones is a fantasy that features a lot of made-up science—fabricated climatology (when is winter coming?), astronomy, metallurgy, chemistry, and biology. Most fans of George R. R. Martin's fantastical world accept it all as part of the magic. A trained scientist, watching the fake science in Game of Thrones, might think, “But how would it work?” In Fire, Ice, and Physics, Rebecca Thompson turns a scientist's eye on Game of Thrones, exploring, among other things, the science of an ice wall, the genetics of the Targaryen and Lannister families, and the biology of beheading. Thompson, a PhD in physics and an enthusiastic Game of Thrones fan, uses the fantasy science of the show as a gateway to some interesting real science, introducing GOT fandom to a new dimension of appreciation. Thompson starts at the beginning, with winter, explaining seasons and the very elliptical orbit of the Earth that might cause winter to come (or not come). She tells us that ice can behave like ketchup, compares regular steel to Valyrian steel, explains that dragons are “bats, but with fire,” and considers Targaryen inbreeding. Finally she offers scientific explanations of the various types of fatal justice meted out, including beheading, hanging, poisoning (reporting that the effects of “the Strangler,” administered to Joffrey at the Purple Wedding, resemble the effects of strychnine), skull crushing, and burning at the stake. Even the most faithful Game of Thrones fans will learn new and interesting things about the show from Thompson's entertaining and engaging account. Fire, Ice, and Physics is an essential companion for all future bingeing.

In a probing analysis of the oldest Buddhist texts, Julius Evola places the doctrine of liberation in its original context. The early teachings, he suggests, offer the foremost example of an active spirituality that is opposed to the more passive, modern forms of theistic religions. This sophisticated, highly readable analysis of the theory and practice of Buddhist asceticism, first published in Italian in 1943 , elucidates the central truths of the eightfold path and clears away the later accretions of Buddhist doctrine. Evola describes the techniques for conscious liberation from the world of maya and for achieving the state of transcendence beyond dualistic thinking. Most surprisingly, he argues that the widespread belief in reincarnation is not an original Buddhist tenet. Evola presents actual practices of concentration and visualization, and places them in the larger metaphysical context of the Buddhist model of mind and universe. The Doctrine of the Awakening is a provocative study of the teachings of the Buddha by one of Europe's most stimulating thinkers.
