

## Persuasive Topics Papers

Offers a step-by-step process to improve students' writing skills using research-based graphic organizers. More than 60 Writing prompts review the five communication processes: Narration, Description, Directions, Explanation, and Persuasion. Students write to the 11 modes of Writing: summary, fictional narrative, personal experience narrative, informational report, letter, invitation, thank-you note, letter to the editor, directions, persuasive paper, and journal.

This uniquely integrative book brings together research on executive function processes from leaders in education, neuroscience, and psychology. It focuses on how to apply current knowledge to assessment and instruction with diverse learners, including typically developing children and those with learning difficulties and developmental disabilities. The role of executive function processes in learning is examined and methods for identifying executive function difficulties are reviewed. Chapters describe scientifically grounded models for promoting these key cognitive capacities at the level of the individual child, the classroom, and the entire school. Implications for teaching particular content areas—reading, writing, and math—are also discussed.

This book constitutes the refereed proceedings of the 10th International Conference on Persuasive Technology, PERSUASIVE 2015, held in Chicago, IL, USA in June 2015. The 19 revised full papers and 5 revised short papers presented were carefully reviewed and selected from 41 submissions. The papers are grouped in topical sections on understanding individuals, empowering individuals and understanding and empowering communities.

*Highly practical and accessible, this indispensable book provides clear-cut strategies for improving K-12 writing instruction. The contributors are leading authorities who demonstrate proven ways to teach different aspects of writing, with chapters on planning, revision, sentence construction, handwriting, spelling, and motivation. The use of the Internet in instruction is addressed, and exemplary approaches to teaching English-language learners and students with special needs are discussed. The book also offers best-practice guidelines for designing an effective writing program. Focusing on everyday applications of current scientific research, the book features many illustrative case examples and vignettes.*

*As the amount of curriculum in today's classrooms expands and teaching time seems to shrink, teachers are looking for ways to integrate content area and writing instruction. In this revised and expanded edition of Writing Across the Curriculum, Shelley Peterson shows teachers how to weave writing and content area instruction together in their classrooms. The author provides practical and helpful ideas for classroom teachers and content-area specialists to easily incorporate writer's workshop while teaching in their subject area. New features in this second edition include: • Websites that can be used to teach writing (e.g., wiki's, weblogs, and digital storytelling) • Examples from grades 4-8 classrooms that show how science, social studies, health, and mathematics teachers can also be teachers of poetry, narrative, and non-narrative writing • New assessment scoring guides • Information on working with struggling writers and supporting*

This Volume, is the first of 2 volumes that are being released together, but under separate covers. Volume 1, contains the instructional guide to teach special education students and English language learners to be successful writers, in 7 easy steps. In view of the increasing educational dropout rate of these special populations, this unique, simple program offers encouragement, hope, and success to students who are struggling in developing their writing skills. Not only is this program easy to learn and remember, but students are able to increase their writing skills in shorter periods of time. This Volume contains five, no-frills, bare-bones lesson plans along with teacher comments. It also includes reproducible Master Guide Sheets, and student Self-evaluation forms. The simplified color coding system is used as a consistent, predictable routine in each writing activity. This program, like no other, promotes student self-confidence and renewed interest in learning. The words, "I can't write" turn into "Yes, I can!" However, the best kept secret is that these 7 easy steps will help all students. Listen to what the kids are saying: "I had a lot of fun with Steps 1 to 7. They really helped me with my work," (comments from an 8th grade student). "The first thing I learned was Steps 1-7. I learned how to write better paragraphs," (comments from an 8th grade student). "I learned how to web my ideas using complete sentences," (comments from an 8th grade student). "I did really well on my writing assessment because I used the 7 steps," (comments from a 9th grade student) "I couldn't write a complete sentence. With these steps, I can write complete paragraphs and essays for Language Arts and Geography. I did well in my writing test, too," (comments from a 9th grade student). Listen to what teachers are saying: "I have been in meetings where parents have commented how effective her writing program has been with helping their kids. I've often heard parents express their gratitude for their child's success due to Ms. Posey's teaching," (comments from a junior high teacher). "After the 9th graders took the writing assessment, several of the students commented on how good they felt about their writing abilities that were a direct result of the efforts of Ms. Posey," (comments from a junior high teacher). "Her strategies and writing techniques resulted in 50% improvement, an impressive increase, in the scores of resource students for the 9th grade direct writing assessment. This is the highest achievement I've seen in my 30 years of teaching," (comments from a secondary special education teacher).  
This practical, comprehensive guide to teaching writing offers English teachers a variety of new, classroom-tested instructional activities, workshops, lesson plans, journal entries, teaching strategies, and creative assignments to use in their classrooms.

Persuasive essays, also called written arguments, are among the most common writing assignments and are used across the curriculum. Yet, despite their common use, many students struggle with the basics of creating a compelling, persuasive argument. Focusing on the four keys to persuasive writing, this booklet uses a step-by-step method to start with an assignment and end with a final draft. By following the clear examples and relying on the included templates, the writer will be able to generate a solid piece of persuasive writing on any topic. Table of Contents: How to Use This Booklet A Special Note about Rogerian Argument Step One: Understand the Assignment Step Two: The Working Outline Step Three: The Thesis Statement Checklist: Eight Things That Can Change Your Grade Step Four: The Introductory Paragraph Step Five: Body Paragraphs Checklist: How to Test Paragraph Organization and Development Step Six: Counter-Arguments Step Seven: Refutations Step Eight: The Conclusion Paragraph Step Nine: The Final Draft The First Layer: Revising Out Loud The Second Layer: Sentence Triage The Third Layer: "Find" Searches Fourth Layer: The Fine Points

Activities like text-editing, watching movies, or managing personal finances are all accomplished with web-based solutions nowadays. The providers need to ensure security and privacy of user data. To that end, passwords are still the most common authentication method on the web. They are inexpensive and easy to implement. Users are largely accustomed to this kind of authentication but passwords represent a considerable nuisance, because they are tedious to create, remember, and maintain. In many cases, usability issues turn into security problems, because users try to work around the challenges and create easily predictable credentials. Often, they reuse their passwords for many purposes, which aggravates the risk of identity theft. There have been numerous attempts to remove the root of the problem and replace passwords, e.g., through biometrics. However, no other authentication strategy can fully replace them, so passwords will probably stay a go-to authentication method for the foreseeable future. Researchers and practitioners have thus aimed to improve users' situation in various ways. There are two main lines of research on helping users create both usable and secure passwords. On the one hand, password policies have a notable impact on password practices, because they enforce certain characteristics. However, enforcement reduces users' autonomy and often causes frustration if the requirements are poorly communicated or overly complex. On the other hand, user-centered designs have been proposed: Assistance and persuasion are typically more user-friendly but their influence is often limited. In this thesis, we explore potential reasons for the inefficacy of certain persuasion strategies. From the gained knowledge, we derive novel persuasive design elements to support users in password authentication. The exploration of contextual factors in password practices is based on four projects that reveal both psychological aspects and real-world constraints. Here, we investigate how mental models of password strength and password managers can provide important pointers towards the design of persuasive interventions. Moreover, the associations between personality traits and password practices are evaluated in three user studies. A meticulous audit of real-world password policies shows the constraints for selection and reuse practices. Based on the review of context factors, we then extend the design space of persuasive password support with three projects. We first depict the explicit and implicit user needs in password support. Second, we craft and evaluate a choice architecture that illustrates how a phenomenon from marketing psychology can provide new insights into the design of nudging strategies. Third, we tried to empower users to create memorable passwords with emojis. The results show the challenges and potentials of emoji-passwords on different platforms. Finally, the thesis presents a framework for the persuasive design of password support. It aims to structure the required activities during the entire process.

This enables researchers and practitioners to craft novel systems that go beyond traditional paradigms, which is illustrated by a design exercise.

Following on from *Writers at Work: The Paragraph* and *Writers at Work: the Short Composition*, *Writers at Work: The Essay* will teach the basics of academic essay writing to intermediate-level students. In *Writers at Work: The Essay*, college and university students use the process approach to write different genres of essays common at the post-secondary level, the most important being expository writing, persuasive writing, and timed essay exams. Each chapter uses the same five-step approach to writing that is used in the two lower-level books. In each chapter, students analyze a model essay, noticing key organizational and linguistic features; brainstorm ideas; write multiple drafts; revise their work; engage in peer reviews; and share their finished work. Chapters recycle and build upon previously taught material.

This book is a major breakthrough for developers of writing assessment programs who must certify the writing competency of undergraduate students. Legislators and accreditation boards across the nation have called for and implemented large scale projects to measure educational outcomes. This single source provides comprehensive information on the history, underlying concepts, and process of conducting a large scale writing assessment program at a specific institution of higher education. The handbook opens with an analysis of the rationale for the assessment of writing during the junior year of the undergraduate curriculum. The authors then turn to a case study of the success of their own institutional wide assessment program. A history is provided of 20th century writing assessment practices; as well, attention is given to defining levels of literacy. After describing an assessment process model, discussion turns to the design of questions, the administration of the assessment, the rating of papers, and the statistical analysis of data. Attention is also given to the design of a course for those who are unsuccessful on the assessment. The study closes with directions for further research and over 200 references in the bibliography.

BLUEPRINTS FOR WRITING: BUILDING ESSAYS demystifies the writing process by guiding you through each step of the essay plan, or blueprint. This text empowers you to write essays from the start, providing numerous practice exercises, activities, and prompts to help you along the way. BLUEPRINTS FOR WRITING focuses on the writing process in various modes of development, offering abundant student writing samples throughout, including more than thirty student essays. Part III includes four chapters on critical reading, providing close reading strategies and six professional readings, which are supplemented by more than twenty additional readings in an appendix. The text also includes comprehensive coverage of the most common grammar, punctuation, mechanics, and style issues that you will encounter. Coverage of incorporating research and practical writing are also included, complete with student samples that illustrate how writing is relevant to your academic, personal, and professional life. *The Middle School Writing Toolkit addresses the 5 major writing genres that middle-school students are expected to master - reports, persuasive essays, how-to (procedural) essays, narratives, and literary responses - and provides 57 mini-lessons and more than 200 workstation tasks to start English teachers well on their way to creating a successful writing program in the classroom.*

*'Building Arguments' offers a fresh new approach to informal logic - successfully combining an accessible style with a rigorous, systematic treatment of argument: -It integrates reasoning and writing, teaching readers to argue effectively and communicate ideas in persuasive prose. -It combines fundamental topics of critical thinking into broader discussions of reasoning. So where*

other books may treat fallacy identification and avoidance, induction and deduction, and validity and soundness as ends in themselves, 'Building Arguments' presents these topics in a practical yet philosophically sound context. -It includes entertaining and relevant examples and exercises drawn from sports, popular advertising, current events, and many academic areas. -'Building Arguments' is unique in its emphasis on helping readers to develop their own persuasive arguments as well as to evaluate arguments from other sources. Using a writing level and organization guided by the principles of reading development, the author introduces material gradually - moving from a very accessible level to a more rigorous one. The result? A book unique in its ability to foster philosophically-based argument analysis while promoting reasoning and writing skills across the curriculum.
