Designing Architecture is an indispensable tool to assist both students and young architects in formulating an idea, transforming it into a building, and making effective design decisions. This book promotes integrative and critical thinking in the preliminary design of buildings to inspire creativity, innovation, and design excellence. This compendium of individual wisdom and collective experience offers explicit guidance to students and young professionals on how to approach, analyze, and execute specific tasks; develop and refine a process to facilitate the best possible design projects; and create meaningful architectural form. Here the design process – from orchestrating client participation to finalizing schematic design – is explored and illuminated. The following material is presented to make the book a useful didactic tool for professional development: explicit strategies for doing design rather than simply reviewing principles and precedents creative ideas in approaching and framing problems in design terms specific methods to translate ideas to culturally significant, socially responsive, and environmentally sensitive buildings techniques to integrate all levels of cognition from analysis to epiphany counsel on developing a personalized process for engaging design projects case studies augment the text and chronicle fascinating applications of the design process. The essence of this book lies in an integrated and holistic approach to each unique project as well as fostering curiosity and exploration – a departure from algorithms, easy generalities, or a formula for design. Designing Architecture will inspire readers to elevate the quality of preliminary designs and unravel some of the mystery of creating the most beautiful, responsive, and responsible architectural design possible.

A New York Times Notable Book "Stunning. . . a moving meditation. . . infused with mystery and wonder." —Atlanta Journal-Constitution In a masterwork that both deepens and enlarges the world of her previous novels, acclaimed author Louise Erdrich captures the essence of a time and the spirit of a woman who felt compelled by her beliefs to serve her people as a priest. The Last Report on the Miracles at Little No Horse deals with miracles, crises of faith, struggles with good and evil, temptation, and the corrosive and redemptive power of secrecy. For more than a half century, Father Damien Modeste has served his beloved Native American tribe, the Ojibwe, on the remote reservation of Little No Horse. Now, nearing the end of his life, Father Damien dreads the discovery of his physical identity, for he is a woman who has lived as a man. To further complicate his quiet existence, a troubled colleague comes to the reservation to investigate the life of the perplexing, possibly false saint Sister Leopolda. Father Damien alone knows the strange truth of Leopolda's piety, but these facts are bound up in his own secret. He is faced with the most difficult decision: Should he tell all and risk everything . . . or manufacture a protective history for Leopolda, though he believes her wonder-working is motivated solely by evil? The Last Report on the Miracles at Little No Horse is a work of an avid heart, a writer's writer, and a storytelling genius.

The Wheel of Time turns, and Ages come and pass. What was, what will be, and what is, may yet fall under the Shadow. In the Prologue to The Gathering Storm, the first volume of the last trilogy of Robert Jordan's Wheel of Time epic, Rand al'Thor, the Dragon Reborn, struggles to unite a fractured network of kingdoms and alliances in preparation for the Last Battle. As he attempts to halt the Seanchan encroachment northward---wishing he could form at least a temporary truce with the invaders---his allies watch in terror the shadow that seems to be growing within the heart of the Dragon Reborn himself. As with the previous three titles in the Wheel of Time series, this prologue from Robert Jordan's The Gathering Storm, completed by Brandon Sanderson, is available for sale before the book's official release date (October 27, 2009). At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

A very dirty book about a very unusual relationship.

Providing a critical framework for the consideration of the relationship between modern social anthropology and linguistics, this volume covers topics such as classification, symbolism, and structuralism. The relevance of the works of Saussure, Lévi-Strauss and Chomsky is considered. There are two case-studies: the first outlines a 'social history' of the succession of pidgins that are documented on the West African coast, ending with Pidgin English. The second analyzes the status of three language varieties used in a 'trilingual' community in the Carnian Alps. Originally published in 1971.

Why does modern planning sometimes create urban environments that are less attractive and functional than the organic urbanism of traditional cities? Cities Design and Evolution takes up the challenge of this question, investigating how cities are put together, both in the sense of how the parts are organized in relation to the whole, and how they are created or evolve over time. Cities Design and Evolution offers an engaging and original narrative that interprets planning philosophies from Modernism to New Urbanism, organic theories from Patrick Geddes to Le Corbusier, and evolutionary thinking from Charles Darwin to Richard Dawkins. The book develops a new evolutionary perspective that recognizes both the designed and organic nature of cities, and provides a rationale and impetus for fresh approaches to urban planning and design. In what is the first book to significantly apply modern evolutionary thinking to urbanism, Cities Design and Evolution promises to stimulate thought, debate and action concerning the nature of cities and future urban planning. The book should appeal to all who are interested in cities, in design and in evolution. "
